# Organelle disease revisited

Metabolics.be  
Symposium

Organised by prof. F. Eyskens and CEMA team Antwerp

UZA / Wilrijkstraat 10 / 2650 Edegem  
Tel +32 3 821 30 00 / [www.uza.be](http://www.uza.be)

Dear colleague,

On behalf of CEMA Antwerp I would like to invite you to the National Symposium of Metabolic Centers Belgium on May 18, 2018. The main topic: organelles disease, from the metabolic pathways towards the cellular compartments (organelles) and back.

The congress will be an excellent opportunity to cover the changes in the field and to envision new perspectives. Renowned speakers agreed to give a lecture and share their experiences.

In addition, specific sessions will be available for dieticians and psychologists in order to encourage their participation in the metabolic field.

We would also like to encourage you to submit abstracts. The best oral communication abstracts will be integrated in the free communications.

We are looking forward to welcoming you to Antwerp.

François Eyskens

## Programme, Friday, May 18<sup>th</sup>, 2018

### 9:00 Registration

**Welcome** - Prof. François Eyskens (UZA)

### Morning Session

#### 10:00 Lysosomal Storage Diseases
